

Locations - First login

First login with an existing FAS account and location information existing.

Hello, Wispfox. Welcome to Fedora Hubs.

As this is your first time logging into Hubs, we would like to verify that we have the correct location information for you. This will allow us to provide more precise recommendations for groups and people near you.

Your privacy is very important to us. Later in this introduction session, you will be able to say who, if anyone, can see where you are.

Note: the default privacy setting shows your state, country, and time zone.

We show you as being located at

[14 Lawrence St](#)
[Waltham, MA 02451](#)
[United States of America](#)

Clicking these will allow in-line editing, and the red x will allow deletion

And your phone number is

[1-617-275-2466](#)
[Add more location information](#)

On click

We have your timezone as being

Eastern Standard Time (EST) - UTC-5

And your email address as

[wispfox@gmail.com](#)

Note: the default privacy setting does not show your email address. People can use in-hubs messaging instead

[Continue on to privacy settings](#)

Region

Such as "Greater Boston area".

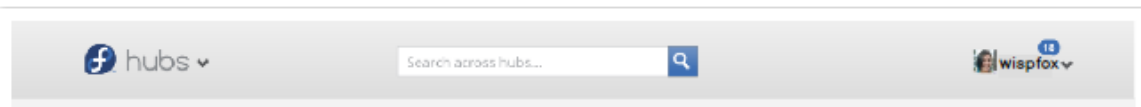

Other types of location information

If there are others who have used that region, this will autopopulate with suggestions when you start typing.

Also, perhaps we should adjust the 'such as' based on what info we do have already?

Locations - First login, some existing info

First login with an existing FAS account and location information existing.

Hello, Wispfox. Welcome to Fedora Hubs.

As this is your first time logging into Hubs, we would like to verify that we have the correct location information for you and offer you the opportunity to add additional information. This will allow us to provide more precise recommendations for groups and people near you.

Your privacy is very important to us. Later in this introduction session, you will be able to say who, if anyone, can see where you are.

Note: the default privacy setting shows your state, country, and time zone.

We show you as being located in

[Massachusetts](#)

[United States of America](#)

Street Address

City

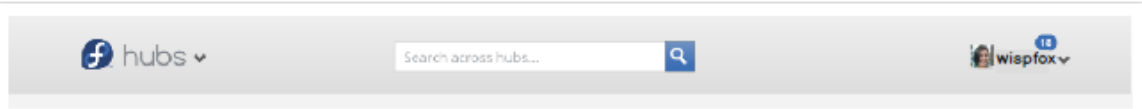

Zip Code

+ Other types of location information

Default and available additional fields will adjust based on the country specified. When the user selects outside of the pop up or hits escape, it'll save what was entered and update this page appropriately.

Locations - First login, no existing info

First login with an existing FAS account and no location information.

Hello, Wispfox. Welcome to Fedora Hubs.

As this is your first time logging into Hubs, we would like to offer you the opportunity to specify your location. This will allow us to provide more precise recommendations for groups and people near you.

Your privacy is very important to us. Later in this introduction session, you will be able to say who, if anyone, can see where you are.

But this might be too disruptive to have a page that they are actively using suddenly change on them... I don't like this. Must think more on how to handle people with no info and the fact that we can't do much guessing without a country.

We show you as being located in [Cyberspace](#)

What country are you in?

← if selected, adjust page... →

I wish to remain in cyberspace only

We show you as being located in [Venezuela](#)

With a time zone of [Venezuelan Standard Time \(VET\) - UTC](#)

[Add more location information](#)

Privacy Settings

By default, everyone in Hubs can see your country, state, and time zone. Below, you can adjust this and use finer grained controls as desired.

Share my country with	Everyone on Hubs ▾	+
Share my state with	Everyone on Hubs ▾	+
Share my city with	People I follow ▾	+
Share my street with	Regional Groups I'm a member of ▾	+
Share my time zone with	Everyone on Hubs ▾	+
Share my phone number with	No one ▾	+
Share my email address with	No one ▾	+

Allow Hubs to use my Street Address ▾ to suggest nearby groups and people.

Everyone on Hubs ▾

All groups I'm a member of
Regional groups I'm a member of
People I follow
No one
Custom...

The phone number field will have an additional option relating to visibility to people via the public invitation page.

Maybe: The general public

Adds another combo box, as someone might like more than one set of groups ('everyone' and 'public' will include things of smaller groups, but others won't. Eg: there is no 'people I follow' and 'groups I am a member of' set).
