Subscribing to a hub while logged in, assumes that you are not local to it

On hover, says that you can only join regional hubs if they are local to you, but you can subscribe to them to see what's going on with them no matter where you are (including cyberspace). Maybe offer the ability to update one's location to join?

Not sure if suggested hubs should show up on one's stream page (since adding them would add things to that) or on one's profile page (along with the hubs that one has already joined). For now, I'm assuming stream.

I'm not sure if 'By Topic' makes sense, but perhaps if one has been following specific topics, or has joined a specific hub, there might be others that make sense?
